New Device Makes Dental Shots Painless

GRAND RAPIDS, MI, January 4, 2010 -- For many, the worst part of going to the dentist is the prospect of needing an injection, the new DentalVibe eliminates this fear for Dr. Dean Weber's patients. Dental Vibe works by delivering vibration to the injection site before delivery of local anesthesia. This approach confuses the nerves that transmit pain.

"The DentalVibe has become an instant hit with our patients," says Dr. Dean Weber of the Aesthetic Dental Center "it eliminates needle phobia and anxiety, because it works."

Studies show that 50% of Americans avoid dental care entirely because of anxiety about pain, most often the pain of dental anesthetic injections. "We want to get the word out that there is a more comfortable way to have dental work done and hopefully get people in for needed treatment sooner." stated Dr. Weber.

Dr. Dean L. Weber of the Aesthetic Dental Center emphasizes aesthetic dental procedures and has been in practice for over 25 years. Weber regularly invests in technology to make dentistry perform better for his patients. Aesthetic Dental Center is located at 1621—44th Street SW, Wyoming, MI 49509. More information about the practice is available by calling them at 616.532.9003 or visiting online at www.mymakeoversmile.com
