NEW! Earlier Cavity Detection Without X-Rays

GRAND RAPIDS, MI, January 3, 2010 -- Dr. Dean Weber of the Aesthetic Dental Center has a new tool in his arsenal of early cavity detection. The Spectra Caries Detection Aid is a special hand held non invasive imaging device that detects tooth decay by measuring increased light-induced fluorescence.

“Not only does it catch cavities earlier, it aids in confirming that all decay has been removed allowing for more precise repair of cavities without the use of x-rays,” says Dr. Weber “early cavity detection helps retain more of the tooth enamel, which is a huge benefit.”

The Spectra Caries Detection Aid was recently named an “Editors Choice” by The Dental Advisor. The science based publication gave the Spectra device a 91% clinical rating.

Dr. Dean L. Weber of the Aesthetic Dental Center emphasizes aesthetic dental procedures and has been in practice for over 25 years. Weber regularly invests in technology to make dentistry perform better for his patients. Aesthetic Dental Center is located at 1621—44th Street SW, Wyoming, MI 49509. More information about the practice is available by calling them at 616.532.9003 or visiting online at www.mymakeoversmile.com
